

COFFEE SHOP SALES

PERFORMANCE DASHBOARD — EXECUTIVE SUMMARY

Purpose

The Coffee Shop Sales dashboard was developed to provide a **comprehensive view of sales performance, customer behaviour, product mix, and store efficiency**. It consolidates multiple KPIs and visualizations into a single interactive platform, enabling management to monitor trends, identify growth opportunities, and optimize operations.

Key Highlights

- **Overall Performance**

- Total Sales: **₹6,98,812.33**
- Total Footfall: **149,116**
- Average Bill per Person: **₹4.69**
- Average Order Size: **1.4 items**

- **Sales Trends**

- Day-wise sales show consistent performance across weekdays, with peaks on **Friday and Saturday**.
- Monthly sales indicate steady growth from **January to June**, reflecting strong seasonal demand.

- **Customer Behaviour**

- Peak ordering hours are **9–10 AM**, aligning with morning coffee demand.
- Average bill per person remains stable, suggesting consistent pricing and product mix.

- **Product Insights**

- Coffee dominates with **39% of sales**, followed by Loose Tea (**28%**) and Branded items (**12%**).
- Top 5 products: **Barista Espresso, Brewed Chai Tea, Gourmet Brewed Coffee, Hot Chocolate, Brewed Black Tea**.

- **Store Performance**

- Highest sales and footfall recorded at **Hell's Kitchen (₹2,36,511)** and **Astoria (₹2,32,943)**.

- Lower Manhattan shows slightly lower performance, indicating potential for targeted promotions.

- **Operational Metrics**

- Size distribution of orders is balanced: **Regular (31%), Large (30%), Small (30%)**.
- “Not Defined” orders (9%) highlight a data quality issue that should be addressed.

Strategic Insights

1. **Morning Rush Optimization:** Staffing and inventory should be aligned with peak demand between 9–10 AM.
2. **Product Mix Strategy:** Coffee and tea drive majority sales; expanding premium offerings could increase average bill size.
3. **Store-Level Promotions:** Targeted campaigns in Lower Manhattan could boost underperforming sales.
4. **Data Quality Improvement:** Address “Not Defined” order sizes to improve accuracy of customer insights.
5. **Cross-Selling Opportunities:** Promote bakery and chocolate items alongside coffee to diversify revenue streams.

Recommendation

1. **Morning Rush Focus:** Treat the 8–10 AM window as critical; staff, stock, and streamline for peak throughput.
2. **Core Product Strategy:** Lean into Coffee as the main category while using Bakery and Drinking Chocolate for upsell opportunities.
3. **Data Quality Fix:** Correct point-of-sale size classification to eliminate the 30% “Not Defined” gap and improve demand planning.
4. **Store Performance Alignment:** Replicate Hell’s Kitchen’s outperformance across Astoria and Lower Manhattan through shared best practices.
5. **Flagship Promotions:** Use Barista Espresso and Brewed Chai Tea as anchor products in loyalty and promotional campaigns.
6. **Demand Smoothing:** Introduce afternoon or lunch-hour promotions to balance the steep post-11 AM decline.
